AB40002 FFC

An All Purpose Fire Fighting Catalyst Foam Concentrate Specially Designed for Professional Fire Fighters & Municipalities

The FFC, is a proprietary Trade Secret Technology and formulations, within the meaning of the Uniform Trade Secret Act ("UTSA") Cal. Civ. Code Sec. 3426, Common law, Business and Profession §17200 and all other applicable statues.

ENVIRONMENTAL & TOXICOLOGY TESTING

AB 40002 (FFC) was independently tested and found to be non-hazardous to fish. The mixture is not an eye or skin irritant and is non-toxic when tested according to the FHSA protocols. It is judged to pose no chronic health hazard. Under European standards (OECD 301 part B), FFC's meet "green" qualification. The FFCs require no special labeling or chronic health hazard warning statements and comply with FHSA regulations, 16 CFR 1500 and California Proposition 65.

LIMITED WARRANTY 10-YEAR WHEN STORED WITHIN THE RECOMMENDED TEMPERATURE WHILE IN THE UNOPENED OR UNDAMAGED **FACTORY SEALED ORIGINAL CONTAINER**

DESCRIPTION

Technology: Fire Fighting Catalyst (FFC) A High Kinetic Catalytic Foaming agent

Concentrate 6% Usable: 1-100% as Needed Training: 0.5%

Approvals & Listings:

- EN1568-3
- ICAO-B
- EN3-6
- UL (Completion IN 2014)

UK MoD:

- 42-40 & 42-42 Milieukeur Certificate
- NPB 155-90 (Russian Fire Standard)

Fire Class Effective: ABCDK (Intl: ABCDF) Subclass Effective: Alcohols - Esters

- Ethers Carbon Composites
- Rubber Plastics
- Magnesium etc.
- Class A Structure Fires:
- Total prevention of thermal inversion phenomenon
- Fast knockdown
- Great retardant reliability no re-ignition

▲ Class B K/F-ALL Hydrocarbon Fuels (Polar, Non Polar, Fats & Vegetable Oils) Great Cooling Effect No Emulsification of Fuels

Class C/E-Effective On: Transformer Fires; Pass Portable System "C"/E Testing @ 35kv

Class D Effective On: Magnesium, Aluminum, Titanium (Not Tested on Sodium & Lithium)

Wildland Fire App.

- Air Drop Land Based Structure Pretreatment
- Fire Brakes Batch Mixable
- No Special Equipment Necessary
- Compatible with Other Products

Additional Advantages

• Great Temperature Reduction $(1800^{\circ}F \text{ to } 135^{\circ}F < 40 \text{ sec.})$

Effective on Marine Fires (Adhere to surface such as fiberglass, etc.)

 Cold Environment Resistant: -4°F (-20°C)

Storage & Handling

- Keep in original factory sealed container or poly tanks
- Avoid contamination of product to prevent biodegradation

Storage: -4°F to 90°F (-20°C to 32°C)

- Do Not Store in Aluminum Container
- Do Not Mix with Hypocrite
- Do Not Use Zinc Metals, Copper or Brass Dip Tubes

Packaging: • 55-gal Poly Drums (208-L) Fill wt.: 540-lbs (245-kg) • 5-gal Carboy (20-L) Fill wt.: 49-lbs Bulk Packaging (By Request)

Technical Specifications

pH @ 25°C: 7.2-7.9 S.G. @ 25°C: 1.100-1.200

XL FFC

A High Performance All Fire Surfaces Class Effective Concentrate

The FFC, is a proprietary Trade Secret Technology and formulations, within the meaning of the Uniform Trade Secret Act ("UTSA") Cal. Civ. Code Sec. 3426, Common law, Business and Profession §17200 and all other applicable statues.

ENVIRONMENTAL & TOXICOLOGY TESTING

FFCs' are independently tested and found to be non-hazardous to fish or any other life forms. The mixture is not an eye or skin irritant and is non-toxic when tested according to the FHSA protocols. It is judged to pose no chronic health hazard. Under European standards OECD 306, and 117 Method 2004, ISO 14669 (1999), ISO 5667-16 (1998), and ISO 10253 2006; (OSPAR/HOCNF) Part B, the FFCs meet "Green" 1 qualifying requirements. The FFCs need no special labeling or chronic health hazard warning statements and are in compliance with FHSA regulations, 16 CFR 1500 and California Proposition 65.

LIMITED WARRANTY 10-YEAR WHEN STORED WITHIN THE RECOMMENDED TEMPERATURE WHILE IN THE UNOPENED OR UNDAMAGED **FACTORY SEALED ORIGINAL CONTAINER**

DESCRIPTION

Technology: Fire Fighting Catalyst (FFC) A High Kinetic Catalytic Foaming agent

Concentrate 3% & 6% Usable: 1-100% as Needed Training: 0.5%

Approvals & Listings:

- EN1568-3 @ 3% 6% (I-A; II-A)
- ICAO-B @ 6%

US Approvals to be completed in 2014 at UL **Testing Facilities**

- Fire Class Effective: ABCDK (Intl: ABCDF) **Subclass Effective:** Alcohols - Esters
- Ethers Carbon Composites
- Rubber Plastics
- Magnesium etc.
- ▲ Class A Structure Fires: Total prevention of thermal inversion phenomenon
- Fast knockdown
- Great retardant reliability no re-ignition

▲ Class B K/F-ALL Hydrocarbon Fuels (Polar, Non Polar, Fats & Vegetable Oils) Great Cooling Effect No Emulsification of Fuels

▲ Class C/E-Effective On: Transformer Fires; Pass Portable System "C"/E

ENVIROSAFE® EBC

An Environment Bio-remedial Catalytic Concentrate

The EnviroSafe® Technology, is a proprietary Trade Secret Technology and formulations, within the meaning of the Uniform Trade Secret Act ("UTSA") Cal. Civ. Code Sec. 3426, Common law, Business and Profession §17200 and all other applicable statues.

ENVIRONMENTAL & TOXICOLOGY TESTING

FFCs' are independently tested and found to be non-hazardous to fish or any other life forms. The mixture is not an eye or skin irritant and is non-toxic when tested according to the FHSA protocols. It is judged to pose no chronic health hazard. Under European standards OECD 306, and 117 Method 2004, ISO 14669 (1999), ISO 5667-16 (1998), and ISO 10253 2006; (OSPAR/HOCNF) Part B, the FFCs meet "Green" 1 qualifying requirements. The FFCs need no special labeling or chronic health hazard warning statements and are in compliance with FHSA regulations, 16 CFR 1500 and California Proposition 65.

LIMITED WARRANTY 10-YEAR WHEN STORED WITHIN THE RECOMMENDED TEMPERATURE WHILE IN THE UNOPENED OR UNDAMAGED **FACTORY SEALED ORIGINAL CONTAINER**

DESCRIPTION

Technology: EnviroSafe® Non flammable (FFC) **Bio-Remedial Technology** (a High Kinetic Foamer)

Concentrate 6%

- Oil Spill Remediation
- Decontamination

Specification: Enviro-Safe® EBC is a water thin concentrate, fully miscible in water for premixing capacity

Application: Ideal for systems and manual application (EBC Can Be Batch Mixed and Also Proportioned)

- Decontaminate equipment and garments
- Prevents the spread of the spill & prepares it for bio-degradation
- For onshore and offshore use
- Deployed through normal fire fighting equipment
- Spray to cover the full spill area
- Protects against ignition
- Use as needed

Fire Class Effective: ABCDK (Intl: ABCDF) Subclass Effective: Alcohols - Esters

- Ethers Carbon Composites
- Rubber Plastics
- Magnesium etc.

Additional Advantages:

- Effective On Marine Fires (Adheres to surface such as fiberglass, etc.)
- Cold Environment Resistant:-4°F (-20°C)
- Great Temperature Reduction $(1800^{\circ}F \text{ to } 135^{\circ}F < 40 \text{ sec.})$

Storage & Handling:

- Keep in original factory sealed container or poly
- Avoid contamination of product to prevent biodegradation

Storage:

-4°F to 90°F (-20°C to 32°C)

- Do not store in Aluminum container
- Do not mix with Hypocrite
- Do not use copper or brass dip tubes

Packaging:

- 55-gal Poly Drums (208-L) Fill wt.: 540-lbs (245-kg) 5-gal Carboy (20-L)
- Fill wt.: 49-lbs

ICESTOPPERTM

- A General Application Eco-Safe Non-Toxic Non-Irritant Non-Aggresive Deicer

The FFC, is a proprietary Trade Secret Technology and formulations, within the meaning of the Uniform Trade Secret Act ("UTSA") Cal. Civ. Code Sec. 3426, Common law, Business and Profession §17200 and all other applicable statues.

ENVIRONMENTAL & TOXICOLOGY TESTING

FFCs' are independently tested and found to be non-hazardous to fish or any other life forms. The mixture is not an eye or skin irritant and is non-toxic when tested according to the FHSA protocols. It is judged to pose no chronic health hazard. Under European standards OECD 306, and 117 Method 2004, ISO 14669 (1999), ISO 5667-16 (1998), and ISO 10253 2006; (OSPAR/HOCNF) Part B, the FFCs meet "Green" 1 qualifying requirements. The FFCs need no special labeling or chronic health hazard warning statements and are in compliance with FHSA regulations, 16 CFR 1500 and California Proposition 65.

LIMITED WARRANTY 10-YEAR WHEN STORED WITHIN THE RECOMMENDED TEMPERATURE WHILE IN THE UNOPENED OR UNDAMAGED **FACTORY SEALED ORIGINAL CONTAINER**

DESCRIPTION

Technology: FireStopper® Fire Fighting Catalyst (FFC) A High Kinetic Catalytic Foaming agent A Clear Aqueous Water Thin Mobile Liquid, Free From Matter in Suspension

- Stable in Storage with No **Agitation Required**
- Does Not Reduce Concrete Pavement Integrity (Insignificant **Surface Penetration Just Enough** to Effect Cleaning)
- Long Term Resistance to **Evaporation**
- Pavement Surface Cleaner: helps Remove Stains & Pavement **Surface Contaminates**

Cold Resistance: -73.4°C (-100°F)

Application: Neat Product (Use as is)

Test * Certs:

This Product is in the Process and Expected to Complete in 2014

Europe: LFV Method 2-98 * 1-98. AIR5567 and Compatibility with **Asphal Concrete Pavement**

Application:

- Pre-wetting: Apply at Spreader outlet at a Rate of 1.2 Gallons per 100 lbs *120 g/kg) of Solid
- Reapply When New Accumulation Shows First Tendency to Bond

Anti-Icing:

- 0.5 Gallons/1000 ft2 (25 g/m2)
- 1 gallon/1000 ft2 (50 g/m2) near 32°F (0°C) on thin ice
- 3 gallons/1000 ft2 (150 g/m2) below 10°F (-12°C) on 1 inch ice

Eco-Safe

This Technology is Proven to be:

- Environmentally Safe
- Non-Toxic

- Non-Irritant
- Non-Aggressive
- Contains over 90% Bio-Based Component

Equipment Compatibility

- Pumps: Stainless Steel (SS) Positive Displacement, Centrifugal/Mechanical Seals
- Plumbing: Stainless Steel
- PVC Polyethylene Rubber **Avoid Galvanized Steel or Alloys** with Zinc

Transfer Hoses:

- Wire Reinforced Chemical hoses (Pressure Rated **Cross-Linked Polyethylene Lining** & EPDM Cover)
- SS Cam & Groove Fittings W/Locking Cam Levers & EPDM Gaskets (Recommended)

Tanks:

- SS, Fiberglass or Poly (tanks) must be capable of holding high specific gravity liquid: approx. 10.4 lbs/gal [1.2 Kg/L])
- Gaskets & Seals: Butyl rubber, EPM & EPDM, isoprene & natural rubber, etc.

Storage/Use: Do Not Use with

- Galvanized (Zinc Plated metals, Brass or Copper)
- Poor Quality Concrete
- Other Manufacturer's Products

Additional Information Available Upon Request

FIRESTOPPER® EXP

The World's First Eco-Safe Anti-Explosion Media & Fire Extinguishing Agent

The FFC, is a proprietary Trade Secret Technology and formulations, within the meaning of the Uniform Trade Secret Act ("UTSA") Cal. Civ. Code Sec. 3426, Common law, Business and Profession §17200 and all other applicable statues.

ENVIRONMENTAL & TOXICOLOGY TESTING

FFCs' are independently tested and found to be non-hazardous to fish or any other life forms. The mixture is not an eye or skin irritant and is non-toxic when tested according to the FHSA protocols. It is judged to pose no chronic health hazard. FireStopper® EXP FFC, a liquid anti explosive and fire extinguishing agent, derived from the FireStopper® FFC technology and designed to ameliorate explosive events. This liquid agent is freeze resistant to:-73.3°C (-100°F), Non-Toxic, Non-irritant and Non-Aggressive ("GREEN"). It's viscosity is water thin and will produce a light foaming event when deployed. EXP has tremendous endothermic properties that will reduce 982°C (1800°F) to ambient temperatures in less than 15-secs. In conjunction with FireStopper® Anti-Explosion Systems, this agent can suppress explosions in less than 50-ms.

FIRESTOPPER® MAXPROTEC™

A Long Term Fire Retardant Designed For Pressure Treatment By The Lumber Industry And Others

The FFC, is a proprietary Trade Secret Technology and formulations, within the meaning of the Uniform Trade Secret Act ("UTSA") Cal. Civ. Code Sec. 3426, Common law, Business and Profession §17200 and all other applicable statues.

LIMITED WARRANTY
10-YEAR WHEN STORED WITHIN THE RECOMMENDED
TEMPERATURE WHILE IN THE UNOPENED OR UNDAMAGED
FACTORY SEALED ORIGINAL CONTAINER

DESCRIPTION

Technology: Fire Fighting
Catalyst (FFC) A High Kinetic
Catalytic Low Foaming agent
Water thin liquid composed
of organic and inorganic
compounds
Does not degrade the wood
fiber. (Does not contain
phosphorus)

MaxProtec[™] is designed with exclusive properties that combine multiple fire suppression and barrier protection environments to deliver deep penetration to the fiber with tremendous endothermic capability providing short, medium and long term retardant capability

- Flame Spread Index: < 5
- Temperature Reduction: (+5000°F to 135°F < 40 sec.)
- Easy To Apply
- Non-Toxic, Non-Irritant
- Non-Hazardous
- Non-Corrosive
- Eco-Safe/Biodegradable
- No Unpleasant Odor

Usage:

- Vacuum Pressure treatment of construction lumber
- Surface Pressure treatment of wooden structures
- General fire retardant as determined by enduser
- Enduser shall determine feasibility of use and application

Suggested Evaluation:

- ASTM E 84-87
- ASTM D 5516-94
- ASTM D 5664-95
- ASTM E-69
- TGA/DTA

Storage & Handling:

- Keep in original factory sealed container or poly tanks
- Avoid contamination of product to prevent biodegradation

Storage:

- -4°F to 90°F (-20°C to 32°C)
- Do not store in Aluminum container
- Do not use copper or brass dip tubes

Packaging:

- 55-gal Poly Drums (208-L)
 Fill wt.: 540-lbs (245-kg)
- 5-gal Carboy (20-L)
 Fill wt.: 49-lbs

Bulk Packaging (by request)
275-gal EU: 1000-L
330-gal
